PROJECTS

SmartCart – E-commerce Web Application GitHub

- Built a full-stack e-commerce application using React.js, TypeScript, Python, and Django.
- Implemented product browsing, JWT-based user authentication, cart management, quantity updates, stock validation, and order creation through backend APIs.
- Used Supabase for image storage; deployed the frontend on Vercel and backend on Render.

Chatter – Twitter-style Social Application

- Developed a social posting application using React.js, Python, Django, and Supabase.
- Implemented account registration and login, tweet creation and viewing, and authenticated navigation with logout.
- Deployed the application on Render.

Note Minde AI – AI-assisted Notes Application

- Built a React.js notes application with an AI mode and browser local-storage support for saving notes.
- Designed the application to let users create and revisit notes without requiring a database for local note persistence.
- Deployed the frontend on Vercel.
